Please briefly present the partner organisation. (e.g. its type, size, scope of work, areas of specific expertise, specific social context and, if relevant, the quality system used).

Erbil Koru Anatolian High school which was built in 1977 by a lawyer named Erbil KORU has 1144 students, 76 teachers and 36 classrooms.

Our aims are;

- to carry out education and training in accordance with the principles of National Education,
- to train qualified workforce who will take part in the academic and other business service areas needed by the public and private sector or who can do business on their own,
- to prepare our students for universities or colleges;
- WE ARE HERE to raise intelligent and dynamic individuals who are beneficial to themselves and to the society, who look to the future with confidence, who are moral, who think positively, who are ready for life, who will bring their country to the level of a civilized, scientific, social and cultural elite country of the world!

We place great emphasis on the academic success and social, cultural development of our participants. Our primary goal is to see them as confident, creative, productive, mentally - physically and spiritually healthy people. We share our knowledge of academic and social, cultural issues.

Our organization focuses mainly on foreign language teaching, using technology in education and ensuring that our students become environmentalist students by drawing attention to environmental issues.

Our mission is;

- to teach academic subjects to our students
- to teach English as a universal language to our students and to enable them to recognize different cultures by easily communicating with people from all over the world
- to contribute their social, emotional and psychological developments
- to improve their digital skills via blended learning (e-learning, webinars, e-tutorials as well as group teaching, Web 2.0, digital resources)
- to ensure that our students are aware of environmental issues and eager to save environment by drawing attention to environmental problems

-
- to develop awareness of people with disabilities and students' respect on this issue.
 - to equip our students with competency in the field of sports

Our vision is

- to become a leading high school in our country through continuously following new methods and techniques in education and innovation in digital skills to contribute to our students and partners.

Our ultimate goal is

- to raise successful, self-confident, innovative individuals who can speak a foreign language, respectful to differences, open to cultural interaction, and engaged in sports activities.

EKAL also intends to cooperate with organizations from other countries both to learn new methodologies, techniques , technological innovations in education and to contribute with our knowledge and experience to gain competences in educational , technological and environmental issues.
